

The following index is composed of keywords selected by presenting authors from a list in the Annual Meeting *Call for Abstracts*. Abstract program numbers follow each keyword.

## ■ Cell division and growth control

### cell competition

177B 178C

### cell growth

4 5 167A 168B 169C 170A

### centrosome

164A

### checkpoint

150B 151C

### condensin

181C

### developmental modulation

155A 156B 157C 158A 159B 160C 161A 162B 163C

### embryogenesis

179A

### endocycle

180B

### kinase/phosphatase/cyclin

152A 153B 154C

### kinetochores and cohesion

165B

### meiosis

6 7 8 143A 144B 145C 146A 147B 148C  
149A

### mitosis

137A 138B 139C 140A 141B 142C

### spindles and motors

166C

### tissue growth

1 171B 172C 173A 174B

### tumor suppressors and oncogenes

2 3 113 175C 176A

## ■ Cytoskeleton and cellular biology

### ABC transporter

219B

### border cell migration

223C

### cell communication

222B

### cellularization

26

### cytoskeleton

27 28 30 182A 183B 184C 185A 186B 187C  
188A 189B 190C 191A 192B 193C 194A 195B 196C  
197A

### cytoskeleton and signaling

225B

### integrin, lasp, cell migration, lamellipodia

221A

### intracellular transport

29 198B 199C 200A 201B 202C 203A 204B 205C  
206A 207B 208C 209A 210B 211C 212A 213B 214C

### mapping, GBR defects, integrin

224A

### proteome

25

### secretion

220C

### vesicles

31 215A 216B 217C 218A

## ■ Drosophila models of human diseases

### addiction

820C

### autism

848A

### CAG repeat instability

60

### cancer

67 813B 814C 815A 816B 817C 818A 819B

### developmental disorders

821A 822B 823C 824A 825B 826C 827A 828B 829C  
830A 831B 832C 833A 834B 835C

### drug discovery

836A 837B 838C

### growth regulation

841C 847C

### infectious disease

846B

### infectious disease/tuberculosis

844C

**laminopathy**  
850C

**listeriosis**  
839A

**mental retardation**  
852B

**mGluR signaling**  
840B

**mitochondrial dysfunction**  
849B

**muscle degeneration**  
843B

**muscular dystrophy**  
66

**neural degeneration**  
61 62 63 64 789B 790C 791A 792B 793C  
794A 795B 796C 797A 798B 799C 800A 801B 802C  
803A 804B 805C 806A 807B 808C 809A 810B 811C  
812A

**pharmacological rescue**  
65

**SARS-CoV**  
842A

**toxins**  
845A

**tumor suppressor**  
851A

## ■ Evolution and quantitative genetics

**evolution and development**  
13 707A 708B 709C 710A 711B

**genome evolution**  
11 12 673C 674A 675B 676C 677A 678B 679C  
680A 681B 682C 683A 684B 685C 686A 687B 688C  
689A 690B 691C

**pathway**  
729B

**phylogenetics**  
725A 726B 727C 728A

**population variation**  
692A 693B 694C 695A 696B 697C 698A 699B 700C  
701A 702B 703C 704A 705B 706C

**quantitative traits**  
9 10 712C 713A 714B 715C 716A 717B 718C

**sexual conflict**  
730C

**speciation**  
14 15 16 719A 720B 721C 722A 723B 724C

## ■ Gametogenesis and sex determination

**apoptosis**  
519B

**oogenesis**  
87 91 463C 464A 465B 466C 467A 468B 469C  
470A 471B 472C 473A 474B 475C 476A 477B 478C  
479A 480B 481C 482A 483B 484C 485A 486B 487C  
488A 489B 490C 491A

**pre-gametogenic germ cell development**  
88 512A 513B 514C

**reproduction**  
520C

**reproductive tract development**  
90

**sex determination**  
515A

**sex-specific traits and molecules**  
516B 517C

**sperm utilization**  
518A

**spermatogenesis**  
84 89 492B 493C 494A 495B 496C 497A 498B  
499C 500A 501B 502C 503A 504B 505C 506A 507B  
508C 509A 510B 511C

**stem cells**  
85

## ■ Genome and chromosome structure

**Cajal body**  
263A

**centromere**  
257A

**chromatin and remodeling complexes**  
53 54 59 226C 227A 228B 229C 230A 231B  
232C 233A

**DNA repair**  
260A 264B 266A

**dosage compensation**  
246B 247C 248A 249B 250C 251A

**genome sequence**  
262C

**heterochromatic simple repeats**  
265C

**insulators/boundary elements**  
55 234B 235C 236A

**nuclear lamina and chromatin proteins**  
261B

**polycomb/trithorax complexes**  
56 237B 238C 239A 240B 241C 242A 243B 244C  
245A

**position effect variegation**  
57

**telomere**  
58 252B 253C 254A 255B 256C

**transposons**  
258B 259C

## ■ Immune system and cell death

**caspases**  
116

**cellular immunity**  
731A 732B 733C 734A 735B 736C 737A

**circadian**  
757C

**crystal cell, lymph gland**  
756B

**death mutants/genes**  
118 119 120 741B 742C 743A 744B 745C

**humoral immunity**  
114 738B 739C 740A

**inhibitors of apoptosis (iaps)**  
117

**Intestinal immunity and phagocytosis**  
754C

**natural variation in immunity**  
752A

**survival signaling**  
755A

**transcriptional regulation**  
746A 747B 748C 749A 750B 751C

**Virus**  
753B

**wound healing**  
115

## ■ Neural physiology and behavior

**alcohol**  
42

**circadian rhythms**  
662A 663B 664C 665A

**courtship and mating**  
44 86 648B 649C 650A 651B 652C 653A 654B  
655C 656A 657B 658C 659A 660B 661C

**exploration**  
670C

**hormones**  
666B 667C 668A

**ion channels**  
38 43 633B 634C 635A 636B 637C 638A

**learning/memory**  
32 33 34 35 639B 640C 641A 642B 643C  
644A 645B 646C 647A

**locomotion**  
671A

**neuropeptides**  
36 628C 629A 630B 631C 632A

**neurotransmitters**  
625C 626A 627B

**seizures**  
669B

**sensory**  
37 39 41 615B 616C 617A 618B 619C 620A  
621B 622C 623A 624B

**sleep**  
40 672B

## ■ Neurogenetics and neural development

**alternative splicing**  
609B

**axon guidance**  
18 560A 561B 562C 563A 564B 565C 566A

**CNS**  
17 23 594B 595C 596A 597B 598C 599A 600B  
601C 602A 603B

**dendrite development**  
19

**glia**  
587A 588B 589C

**glycan expression**  
613C

**glycosyltransferase, CNS, sialic acid**  
611A

**hormonal control**  
590A 591B 592C 593A

**neuroblast**  
612B

**neurogenesis**  
614A

**neuronal specification**  
20 21 22 570B 571C 572A 573B 574C 575A  
576B 577C 578A 579B 580C 581A 582B 583C 584A  
585B

**postembryonic**  
607C 608A

**programmed cell death**  
586C

**sensory**  
112 604C 605A 606B

**serpin, proteolysis, nervous system**  
610C

**synaptogenesis**  
24 45 567B 568C 569A

## ■ Organogenesis

**ectodermal and mesodermal derivatives**  
556C

**ectodermal derivatives (nonneural)**  
78 80 81 539A 540B 541C 542A 543B 544C  
545A 546B 547C 548A

**endodermal derivatives**  
79

**extracellular matrix/cell adhesion**  
82 83 549B 550C 551A 552B 553C 554A 555B

**mesodermal derivatives**  
76 77 521A 522B 523C 524A 525B 526C 527A  
528B 529C 530A 531B 532C 533A 534B 535C 536A  
537B 538C

**polarity**  
559C

**trachea, salivary duct**  
557A

**tracheogenesis, FGF signaling**  
558B

## ■ Pattern formation

**axis specification**  
129 134 135 136 419A 420B 421C 422A 423B  
424C 425A 426B 427C 428A 429B 430C 431A 432B

**cell migration and motility**  
438B 439C 440A 441B 442C 443A 444B

**cell polarity**  
107 132 445C 446A 447B 448C

**cell shape regulation**  
105

**cell survival, cell death, growth and patterning**  
104

**compartments and boundaries**  
131 433C 434A 435B 436C 437A

**epithelial patterning**  
462B

**homeotics**  
130 417B 418C

**imaginal disk derivatives**  
100 101 102 103 106 110 449A 450B 451C  
452A 453B 454C 455A 456B 457C 458A 459B

**leg mechanosensory bristle patterning**  
460C

**segmentation**  
133 406C 407A 408B 409C 410A 411B 412C 413A  
414B 415C 416A

**theory**  
461A

## ■ Physiology and aging

**cytochrome, steroid hormone, ecdysone, xenobiotic**  
878A

**dietary restriction**  
68 868C 869A

**endocrine function**  
73 74 865C 866A 867B

**genes affecting**  
877C

**metabolism**

857A 858B 859C 860A 861B 862C

**muscle**

879B

**nutrient sensing**

69 75 864B

**nutrition**

70 863A

**oxidative damage**

870B 871C 872A 873B 874C

**physiology of adult organs**

71 875A 876B

**stress response**

72 853C 854A 855B 856C

**■ Regulation of gene expression****activators/coactivators**

288B 289C 290A 291B 292C 293A 294B 295C

**Broad, Acp65A, DHR38, adult cuticle gene**

328C

**core promoters and general transcription**108 267B 268C 269A 270B 271C 272A 273B 274C  
275A**ecdysone**

332A

**enhancers**111 125 126 276B 277C 278A 279B 280C 281A  
282B 283C 284A 285B 286C 287A**imaging/activator**

124

**inducible expression system**

334C

**insulator**

331C 339B

**K channel, promoter bashing, drug tolerance**

335A

**loqs and microRNA**

330B

**protein modification, embryogenesis, oogenesis**

337C

**rasiRNAs**

341A

**repressor/activator**

343C

**repressors/corepressors**121 123 127 296A 297B 298C 299A 300B 301C  
302A**RNA localization**

319C 320A 321B 322C 323A 324B 325C 326A 327B

**RNA modification and editing**

309B 310C 311A

**RNA stability**

336B

**RNAi, miRNA**

329A

**RNAi, satellites, heterochromatin**

340C

**RNAPII complex**

333B

**SELEX**

338A

**sequestration**

342B

**splicing and its regulation**

304C 305A 306B 307C 308A

**transcription elongation**

303B

**translational control**

109 122 312B 313C 314A 315B 316C 317A 318B

**■ Signal transduction****cell-cell communication**47 48 49 128 354B 355C 356A 357B 358C  
359A 360B**crosstalk**

397C

**downstream cascades and targets**46 51 52 372B 373C 374A 375B 376C 377A  
378B 379C 380A 381B 382C 383A 384B 385C 386A  
387B 388C 389A 390B 391C 392A 393B**endocytosis**

396B 399B

**G protein**

361C

**Hedgehog signal**

394C

**heparan sulphate proteoglycan**  
398A

**imaginal disc morphogenesis**  
400C 404A

**kinase, Ci, CKI, Slimb**  
401A

**kinase/phosphatase**  
344A 345B 346C 347A 348B 349C 350A 351B 352C  
353A

**ligand secretion**  
395A

**oncogene cooperation**  
405B

**receptor regulation**  
403C

**receptor-ligand**  
50 362A 363B 364C 365A 366B 367C 368A 369B  
370C

**second messengers**  
371A

**vesicle trafficking**  
402B

## ■ Techniques and genomics

---

**automation**  
780B

**cDNA cloning**  
788A

**computational analyses**  
98 769C 770A 771B 772C 773A 774B 775C

**DNA repair**  
787C

**flow cytometry**  
783B

**gene disruption and targeting**  
764A 765B 766C

**gene mapping**  
97 767A 768B

**human gene**  
782A

**microarrays**  
92 93 758A 759B 760C 761A 762B 763C

**microarrays, proteomic and microscopy**  
785A

**molecular interactions**  
94 778C 779A

**mutational screens**  
99 776A 777B

**non-coding RNA**  
784C

**protein trapping**  
781C

**stock center**  
786B

**transgenesis**
